## SUMMARY

DevOps Engineer skilled in AWS, Kubernetes, Terraform, CI/CD, and observability. Built monitoring and alerting with Prometheus, Loki, Lambda, and EventBridge; automated deployments with Jenkins and ArgoCD; implemented VPC peering, SSL, ingress, and Helm workflows; and developed custom autoscaling logic. Strong ownership of services and experience mentoring juniors.

## EDUCATION

**Amity University, Noida**

Bachelor of Technology in **Computer Science**

Jul 2020 – Jun 2024

CGPA: 9.2

## TECHNICAL SKILLS

**Cloud & DevOps:** AWS (EKS, Lambda, EventBridge, ACM, VPC Peering), Terraform, Docker, Jenkins, ArgoCD

**CI/CD & Automation:** Jenkins, ArgoCD, Ansible, Helm, Terraform

**Monitoring & Observability:** Prometheus, Loki, Grafana, CloudWatch

**Networking:** VPC, Subnets, Route Tables, Ingress, HAProxy, Jump Hosts

**Data & Messaging:** Redis, Kafka, DynamoDB

**Programming:** Python, Bash, Java

**Tools:** Jira, Confluence, Bitbucket

## PROFESSIONAL EXPERIENCE

**Paytm**

Noida, India

*DevOps Engineer*

Apr 2025 – Present

- Designed and owned the end-to-end monitoring, logging, and alerting system using **Prometheus, Loki, Lambda, and EventBridge**; defined alert rules, thresholds, and automated notifications to improve incident response and reduce alert noise.
- Implemented a custom **load-average based autoscaling solution** using **AWS Lambda and DynamoDB**, enabling intelligent scaling beyond default HPA metrics.
- Owned CI/CD pipelines using **Jenkins and ArgoCD**, standardized Docker build workflows, and managed the complete service lifecycle including infrastructure provisioning, monitoring, scaling, and security.
- Contributed to migration of services from **EC2 to Amazon EKS** with the team and supported **EKS cluster updates and maintenance**.
- Designed and maintained **Helm charts** for microservices, ingress components, and **HAProxy**; implemented **HAProxy-based L7 routing**, SSL termination, and ingress traffic management for EKS workloads.
- Managed DNS and traffic routing using **Route 53** and integrated **ACM SSL certificates** to secure ingress and load balancer communication.
- Worked with **Redis** for caching and **Kafka** for messaging pipelines; mentored junior engineers on AWS networking, IaC, CI/CD best practices, and observability.

**DevOps Intern – Paytm**

Oct 2024 – Mar 2025

- Supported monitoring, logging, and alerting using **Prometheus, Loki, and AWS Lambda**; assisted with on-call readiness.
- Contributed to **Jenkins CI pipelines**, Docker workflows, **Terraform** environments, and **EKS networking** (ingress, routing, jump-host access).

## PROJECTS

**User Management System (Next.js, NextAuth, MySQL)** – Role-based user and organization management with secure authentication.

**QueueGo – Smart India Hackathon Finalist** – Real-time queue management application using AWS, Google Maps, and Twilio.

## ACHIEVEMENTS & CERTIFICATIONS

Smart India Hackathon 2022 Finalist

Postman Student Leader
